

Power Your Print Shop with Avanti and Xerox

Drive profitability into your shop

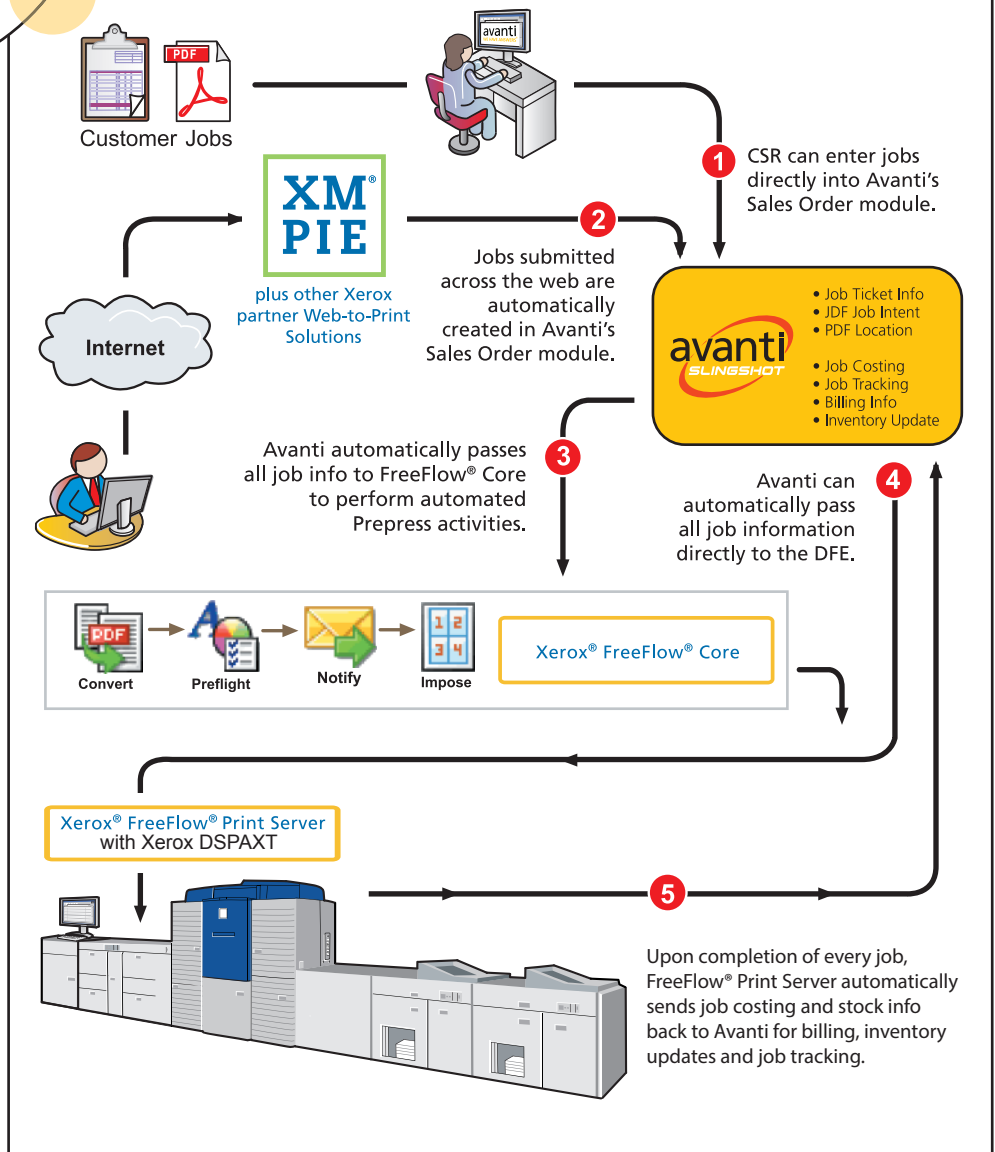

OVERVIEW

Avanti's award-winning Print MIS system is fully integrated with Xerox FreeFlow® Digital workflow portfolio, automating all facets of the print shop.

Avanti Slingshot offers a robust Application Programming Interface (API) and leverages industry standard protocols such as JDF/JMF and XML to communicate with XMPie, other Xerox partner Web-to-Print solutions, and Xerox's FreeFlow Digital Workflow framework.

The result is optimized workflows, reduced costs and errors, improved turnaround time and the opportunity for print providers to generate new revenue streams through enhanced services that can be processed via the web and tracked and managed throughout the entire workflow, without the need for human intervention.

Zero-touch Workflows through Digital Print Automation
