

AVANTI SLINGSHOT® AND ENFOCUS: ALIGNMENT ACROSS YOUR ENTIRE SHOP

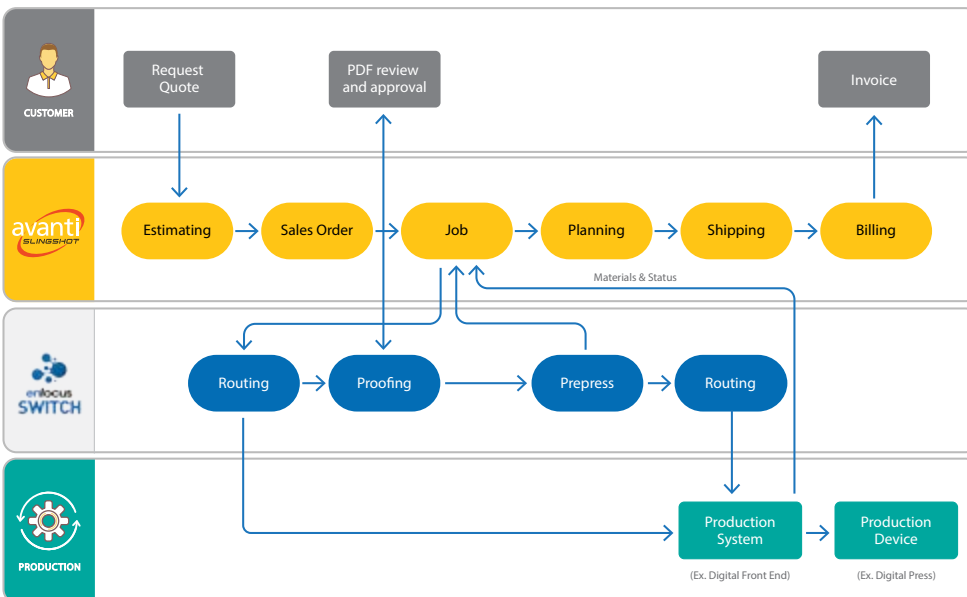

INTEGRATION WITH ENFOCUS SWITCH

Enfocus Switch's open architecture and neutral file-format handling create a seamless integration with Avanti Slingshot®.

Avanti Slingshot® sends job details via JDF to Enfocus Switch, where they are parsed for job processing. When job processing is complete, Enfocus Switch sends production details back to Avanti Slingshot® via JDF. Slingshot® then uses the information to update in real time the status of operations (milestones), create cost entries for labor and material, and adjust inventory for any materials used on the job.

The bi-directional communication between Avanti Slingshot® and Enfocus Switch is fully automated. There are no user touch points and all manual work related to entering job and production details is completely eliminated. You will benefit by freeing staff time for more valuable activities, having more resources dedicated to your customers' needs, shortening turnaround time by automatically routing files through production, and reducing the potential for errors.

Together Avanti and Enfocus are a complete print-production solution that saves manual labor costs and reduces the risk of errors.

enfocus

About Enfocus

Enfocus provides modular and affordable tools to safeguard job quality and automate the entire production chain. Innovative solutions improve communication between design and production, and enhance productivity and predictability by automating routine tasks.

Let Switch do the work for you:

- Automated receiving, sorting and routing for incoming jobs
- Automated PDF quality control with manual correction cycle
- Native layout documents converted to print-ready PDF files
- Automated receiving and verifying web-to-print jobs
- Online proof approval

BENEFITS AT A GLANCE

Automating your PDF job workflow shortens turnaround times, reduces the potential for errors and frees up hours that your staff can spend on more valuable activities.

Automated, Bi-Directional PDF Job and Production Data Flow

- Remove all user touch points
- Completely eliminate manual work involved with entering job and production details

Operational and Quality Improvements

- Reduce labor costs by automating repetitive tasks
- Eliminate the potential for errors by reducing the number of touchpoints when receiving, sorting and processing PDF files for print
- Free up staff to spend time on higher-value activities

Improved Service Levels

- Faster turnaround times by moving files immediately to the right place
- Print Ops spends more time focused on customer
